## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments see page, 5, lines 6 & 7, filed 05/09/2005, with respect to claims 1-12 have been fully considered and are persuasive. The rejection of claims 1-12 has been withdrawn.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weiser et al (U.S. 5,982,507) and Drucker et al (U.S. 6,292,796)

4. As per claims 1, 9 & 12 Weiser disclosed a system for distributing information comprising: a first client computer having first software with a print functionality; a second client computer; a network connecting said first and second client computers (col.4, lines 26-44 & col.5, lines 1-6). However Weiser did not explicitly disclose means for effecting communication of a document from said first client to said second client as email via said print functionality thereof.

Art Unit: 2143

In the same filed of endeavor Drucker disclosed means for effecting communication of a document from said first client to said second client as email via said print functionality thereof (col.10, lines 21-32).

At the time the invention was made it would have been obvious to one of ordinary skill in the art to have incorporated the means of effecting communication of a document from one client to another as e-mail via a print functionality as disclosed by Drucker to the system of distributing information as disclosed by Weiser in order to provide the user with a more versatile , flexible and user friendly network experience.

5. As per claim 2 Weiser-Drucker disclosed the invention of Claim 1 wherein said first software is application software (Weiser col.4, lines 60-67).

6. As per claim 3 Weiser-Drucker disclosed the invention of Claim 1 further including a server connected to said network (Weiser col.4, lines 26-44).

7. As per claim 4 Weiser-Drucker disclosed the invention of Claim 3 wherein said means for effecting communication includes means for communicating said document through said server (Weiser col.1, lines 55-67, col.2, lines 1-5 & col.5, lines 1-6).

8. As per claim 5 Weiser-Drucker disclosed the invention of Claim 4 wherein said means effecting communication includes a first agent running on said client (Weiser col.1, lines 45-51 & col.5, lines 1-6).

9. As per claim 6 Weiser-Drucker disclosed the invention of Claim 5 wherein means for communicating includes a second agent running on said server (Weiser col.8, lines23-27).

10. As per claim 7 Weiser-Drucker disclosed the invention of Claim 1 further including email software running on said second client for receiving said document (Weiser col.1, lines 23-30 & col.8, lines 10-19)

11. As per claim 8 Weiser-Drucker disclosed the invention of Claim 7 wherein said email software includes means for receiving a message associated with said document from said first client (Weiser col.1, lines 35-42 & col.3, lines 32-39).

12. As per claim 10 Weiser-Drucker disclosed the invention of Claim 9 further including email software running on said second client for receiving said document (Weiser col.2, lines 25-30, col.5 & lines 50-57).

13. As per claim 11 Weiser-Drucker disclosed the invention of Claim 10 wherein said email software includes means for receiving a message associated with said document from said first client (Weiser col.2, lines 25-30, col.3, lines 32-39).
